

MANAGED SERVICE PROVIDER COLLECTIVE

FOR THE PROTECTION OF CRITICAL INFRASTRUCTURE

**Secure our
Critical
Infrastructure**

**Support the
Critical
Infrastructure
Industries**

**Improve
National
Security**

OUR MISSION

To inform the US Government and Critical Infrastructure industries on topics related to Managed Service Providers (MSP) and Managed Security Service Providers (MSSP) dedicated to the National Security mission of maintaining a secure, functioning, and resilient critical infrastructure.

AS A COLLECTIVE

We desire to collaborate as an industry advisory group to Congress, DoD, the Cyber AB, and state legislatures to provide insight into the importance of external service providers in securing critical infrastructure, the federal contracting base, and especially the Defense Industrial Base.

STANDARDS

As a collective, we believe in identifying minimum requirements for External Service Providers (ESPs) that exceed the minimum requirements for CUI protection as defined in DFARS 252.204-7012 / NIST SP.800-171.

- ✓ A NIST Cybersecurity Framework (CSF) Profile for ESPs
- ✓ A NIST SP 800-53 Tailored Baseline for ESPs
- ✓ Suggested changes to standards such as SP 800-171

APPROPRIATIONS

We understand that proposals that have been submitted to Congress which include DoD appropriations for grants to DIB members to offset the necessary one-time investment in getting the DIB to CMMC compliance. The MSP Collective supports this effort and will continually seek new ways to support critical infrastructure

- ✓ Advocate for small businesses in the DIB

CERTIFICATIONS

Through involvement in the CyberAB and CMMC program, our collective has encountered several flaws that require attention to strengthen the DIB and their adjoining atmosphere.

Making sure critical infrastructure remains:

- ✓ Operational
- ✓ Safe
- ✓ Resilient
